

help is available

Why is Florida doing this?

To protect unwanted babies from being hurt or dying because they were abandoned.

To promote alternatives to a frightened woman or teenager who in a moment of desperation may do something drastic and tragic.

How can I help this cause?

You may call the help line operated by A Safe Haven for Newborns to offer your assistance in promoting awareness of the law and services available. A Safe Haven for Newborns works with other organizations throughout the state, such as the Healthy Start Coalitions, and can provide you with volunteer information. For more information on becoming an adoptive parent, call 1-800-96 ADOPT.
